**Subject:** case 09/488265

Hi David,

I was wondering if you could do some alignments for me. I need seq id 26, 27, 29 and 31 of case 09/488265 against seq id 129, 130, 132, 134, of case 09/343,126. They should all be proteins.

Thanks,

Delia

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, **.rnpm** and **.rnpn**

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, **.rapm** and **.rapn**

***The Pending database search results should not be left in the case because they contain data that is confidential.***
